Biography

I am a postdoctoral researcher (Shuimu Scholar) at the Institute of Future Cities and Infrastructures, Tsinghua University, where I work with Prof. Dongping Fang. I received my Ph.D. degree from the School of Artificial Intelligence and Automation, Huazhong University of Science and Technology, supervised by Prof. Zhiguo Cao. My research interests lie in (1) 3D vision and image manipulation, with a particular emphasis on computational photography; (2) multimodal language models and their applications in construction automation.

Experience

Project Officer | S-Lab for Advanced Intelligence, Nanyang Technological University — Nov 2023 – Nov 2024
Advisor: Prof. Guosheng Lin

Project

S-Lab Funding Project on Human Avatar Modeling Nov 2023 – Nov 2024
I serve as a core member responsible for:

1. collecting the datasets required for the character animation task. I also clean the collected data to ensure its accuracy and availability and provide a high-quality foundation for the subsequent training of the action generation model.

2. capturing and synthesizing data for the human avatar modeling task. I conduct research on high-fidelity human avatar reconstruction, collaborating closely with team members.
